OBJECTIVE

Motivated and detail-oriented Computer Science undergraduate with strong backend and full-stack development skills, seeking a Software Developer role that enables me to build scalable and secure enterprise applications. Passionate about leveraging Java, Spring Boot, RESTful APIs, and modern databases (SQL/NoSQL) to contribute to impactful solutions. Actively exploring microservices, DevOps, and cloud-native architectures to align with industry innovations.

EDUCATION

B.Tech in Computer Science – Amrita Vishwa Vidyapeetham, Bengaluru (2022 – Present) CGPA: 9.1/10
Senior Secondary (XII) – Anand Swaroop Arya Saraswati Vidya Mandir, Roorkee (2020 – 2021) 94%
Secondary (X) – Anand Swaroop Arya Saraswati Vidya Mandir, Roorkee (2018 – 2019) 93.4%

INTERNSHIP

Software Developer Intern May 2025 – July 2025
Eapro Global Limited, In-person

- Designed and implemented core features of the EZCheck Visitor Management System using modular JavaScript (ES Modules) and API integrations.
- Built dynamic check-in flows with secure phone-based authentication and collaborated with backend developers to streamline data handling and improve scalability.

Software Project Intern May 2024 – June 2024
Infosys Springboard, Remote

- Built a full-stack Flight Management System integrating Spring Boot and MongoDB, featuring user authentication, dynamic flight search, and secure booking workflows in an Agile sprint-driven environment.
- Developed RESTful microservices with JSP views and optimised backend performance using database indexing and query tuning in MySQL.

PROJECTS

BacterialPathogenAnalyzer: Mobile App for Pathogen Identification May 2025 – Present
React Native, Expo, Supabase, PostgreSQL, Node.js, Python, Pandas [GitHub](#)

- Developed a cross-platform mobile app for rapid bacterial pathogen identification, featuring camera-based image analysis, guided AI diagnostics, and secure multi-user access.
- Built with Supabase backend (PostgreSQL, RLS), real-time data sync, and robust authentication, supporting both email logins.
- Mapped to SDG 3 (Good Health & Well-Being) and SDG 9 (Industry, Innovation & Infrastructure) by empowering healthcare workers with accessible, reliable digital diagnostics.

AirSavvy: Smart Flight Management System Sep 2024
Java, Spring Boot, MongoDB, JSP, Google Gemini AI [GitHub](#)

- Designed a production-ready flight booking platform with real-time search, secure payment workflows, and admin-side management features.
- Integrated Gemini AI to provide live chat support. Developed secure REST APIs for user authentication and data integrity, aligning with BFSI-grade security standards, and used MongoDB indexing for efficient query performance.
- The project is hosted on Render and can be accessed from airsavvy.onrender.com

J.A.M.E.S: Judicial Admin Management & Execution System Dec 2023 – Feb 2024
Spring Boot, MySQL, JavaScript, Bootstrap [GitHub](#)

- Digitised legal case processes including public filing, lawyer assignment, status tracking, and admin panel. Built to support SDG 16 goals (justice & transparency).
- Migrated core functionality from PHP to Spring Boot, improving maintainability and modularisation.

PUBLICATIONS

- Ojas, et al., “PathPower: Footstep-Driven Street Lighting,” **CRM 2025**, February 2025.
- Ojas, et al., “JAMES: Enhancing Judicial Efficiency with Smart Administration,” **ICOFE-2024**, October 2024.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, SQL, HTML, CSS
- **Frameworks:** Spring Boot, Spring MVC, React, Bootstrap
- **Web & APIs:** RESTful APIs, Microservices Architecture, JSP, JWT Auth
- **Databases:** MySQL, MongoDB, NoSQL (indexed schemas)
- **DevOps & Cloud:** Docker, AWS (EC2, S3), Supabase, Git
- **Tools:** IntelliJ, VS Code, Postman, GitHub, Linux/Unix CLI
- **Practices:** Agile/Scrum, Modular Codebase Design, Secure Coding, Testable Services
- **Soft Skills:** Leadership, Collaboration, Team Management

CERTIFICATIONS

- Java Full Stack Developer – Coursera
- AWS Cloud Foundations – Amazon Web Services
- Database Management System (Parts 1 & 2) – Infosys Springboard
- Introduction to NoSQL Databases – Infosys Springboard
- Young Java Professional – Infosys
- JavaScript Algorithms – FreeCodeCamp
- Linux Shell Scripting – Udemy
- React Certification – GeeksforGeeks

LEADERSHIP & ACHIEVEMENTS

- Awarded NCC 'B' Certificate (2022) for leadership and discipline at national-level training.
- Active participant in coding contests on LeetCode and GFG; regularly solves algorithmic problems.
- Co-organised workshops mentoring peers in Java, databases, and full-stack tools.
- Runner-up in interdepartmental handball tournament and member of the college cricket team.
